

**Commitment to Achieving Net Zero**

Consortio Security Ltd is committed to achieving Net Zero greenhouse gas emissions by 2045, ahead of the UK Government's 2050 target.

As a national provider of physical and technical security services, we recognise our responsibility to minimise the environmental impact of our operations and to continuously improve energy efficiency across our fleet, buildings and operational activities.

This commitment aligns with our ISO 14001:2015 Environmental Management System, our compliance with the Energy Savings Opportunity Scheme Phase 3, and our ongoing Business KPI monitoring framework.

**Baseline Emissions Footprint**

The baseline year for emissions reporting is 2022, aligned with the ESOS Phase 3 reference period.

**Baseline Year Emissions 2022**

Emissions Source	Emissions tCO <sub>2</sub> e
Scope 1 Fleet fuel	24.6
Scope 2 Electricity and gas	6.7
Scope 3 Selected categories	8.0
<b>Total baseline emissions</b>	<b>39.3</b>

Emissions have been calculated using DEFRA and BEIS 2022 conversion factors and are based on verified electricity, gas and fleet fuel data submitted under ESOS Phase 3.

**Current Emissions Reporting**

The most recent reporting year is **2024**.

**Current Emissions 2024**

<b>Emissions Source</b>	<b>Emissions tCO<sub>2</sub>e</b>
Scope 1	23.5
Scope 2	6.5
Scope 3	6.8

**Total current emissions 36.8**

This represents a reduction of approximately **6.3 per cent** compared to the 2022 baseline.

**Emissions Reduction Targets**

Consortio Security Ltd has set the following carbon reduction targets relative to the 2022 baseline year.

**Target Year Reduction Target**

2027	15 percent
2030	30 percent
2040	70 percent
2045	Net Zero

Residual emissions at the Net Zero target year will be minimised and offset only where unavoidable.

**Carbon Reduction Projects**

**Completed and Ongoing Measures**

Consortio Security Ltd has already implemented a number of measures to reduce carbon emissions. These include gradual renewal of the company vehicle fleet to more fuel-efficient and hybrid models, improved route planning and scheduling for mobile operations, enhanced office energy management through thermostat and control optimisation, replacement of

legacy IT equipment with energy-efficient alternatives, and continued digitalisation to reduce paper use.

**Planned Measures**

Planned actions include the introduction of a structured driver efficiency and fuel use awareness programme, further optimisation of lighting controls and timers at the Head Office, increased deployment of solar-assisted and low-energy security infrastructure, and continued fleet transition aligned with operational requirements and charging availability.

**Governance and Monitoring**

Carbon and energy performance is monitored through monthly Business KPI reporting, annual ISO 14001 management reviews, ESOS Action Plan tracking, and regular board-level oversight by the Chief Executive Officer and Chief Operating Officer.

All supporting data and evidence are retained within the organisation's environmental and ESOS compliance systems.

**Declaration and Sign Off**

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.
